THE EYE TIMES HOLIDAY BRAIN BUSTERS

- A frog is at the bottom of a 30 metre well. It can climb up 3 metres during the day but slips back 2 metres each night. How many days does it take him to get out of the well?
- A hunter walks 10 km due south, then 10 km due west and then 10 km due north - he is back where he started from - he fires a gun and kills a bear. What colour is the bear?
- Mary's mum has four children. The first child is called April. The second is called May. The third is called June. What is the name of the fourth child?
- How many grooves are there on each side of a 33 RPM LP record?
- A shop assistant at a butcher shop stands 1.89 m tall and wears size 13 shoes. What does he weigh?
- Before Mt. Everest was discovered, what was the highest mountain in the world?
- If you were running a race and you passed the person in 2nd place, what place would you be in now?
- A bottle of wine cost \$10. The wine was worth \$9 more than the bottle. What was the bottle worth?

Arthur Wynne, a journalist from Liverpool, created the first known published crossword puzzle in December 21, 1913
